

How do I add a module in Canvas?

Modules can be used to organize course content by weeks, units, or any other structure.

1. To add a module, click the “+ Module” button in the upper right corner.

2. In the “Add Module” dialog, type the name of the module and click the “Add Module” button. This dialog also gives an option to keep the module locked until a certain date, or to add a prerequisite if another module must be completed by the student before they can begin this module.

A screenshot of the 'Add Module' dialog box. The title bar says 'Add Module' with a close button (X) on the right. Below the title bar is a text input field containing 'Week 1', which is highlighted with a red rectangle. Underneath the input field is a checkbox labeled 'Lock until'. Below that is a section titled 'Prerequisites' with a link that says '+ Add prerequisite'. At the bottom right of the dialog, there are two buttons: 'Cancel' and 'Add Module', with the 'Add Module' button highlighted by a red rectangle.
