

## How do I set a page as the home page for my course?

1. To assign a particular page as the home screen for your course, click the page menu button (3 dots) and select “Use as Front Page.”

2. Then, from the “Home” link on the navigation menu, click the “Choose Home Page” button.

3. In the “Choose Course Home Page” dialog, select the “Pages Front Page” option, which should show the name of the page you set as your front page in the previous step. If it doesn’t show the correct page name, click the “Change” link to select the page you would like to set as your front page, then click “Save”.

## Choose Course Home Page ×

Select what you'd like to display on the home page.

☐ Course Activity Stream

☒ Pages Front Page *Welcome!* [\[Change\]](#)

☐ Course Modules

☐ Assignments List

☐ Syllabus

CancelSave

- Click the “Home” link on the navigation menu to see the page you set as your front page. This will be the first page the students will now see when they enter the course.

wsause@stetson.edu

Welcome to BSAN 300: Programming for Analytics. In this course, you will learn the fundamentals of programming and analytics using the Python programming language. We will examine programming concepts including input and output, control statements, functions, sequences, lists, dictionaries, files, and classes. The course description, materials, objectives, grading and other important course information can be found in the [syllabus](#) . The main textbook for this course as well as the homework and in-class assignments will be available through the MindTap learning platform. I will walk through the MindTap registration process during the first day of class (**Friday, 8/20**); you are not required to purchase any course materials beforehand.
