

Examples of Direct Measures of Student Learning

- **Scores and pass rates on standardized tests** (licensure/certification as well as other published tests determining key student learning outcomes)
- **Writing samples**
- **Score gains** indicating the “value added” to the students’ learning experiences by comparing entry and exit tests (either published or locally developed) as well as writing samples
- **Locally designed quizzes, tests, and inventories**
- **Portfolio artifacts** (these artifacts could be designed for introductory, working, or professional portfolios)
- **Capstone projects** (these could include research papers, presentations, theses, dissertations, oral defenses, exhibitions, or performances)
- **Case studies**
- **Team/group projects and presentations**
- **Oral examination**
- **Internships, clinical experiences, practica, student teaching, or other professional/content-related experiences** engaging students in hands-on experiences in their respective fields of study (accompanied by ratings or evaluation forms from field/clinical supervisors)
- **Service-learning projects or experiences**
- **Authentic and performance-based projects or experiences** engaging students in opportunities to apply their knowledge to the larger community (accompanied by ratings, scoring rubrics or performance checklists from project/experience coordinator or supervisor)
- **Graduates’ skills in the workplace rated by employers**
- **Online course asynchronous discussions** analyzed by class instructors
Whenever appropriate, scoring keys help identify the knowledge, skills, and/or dispositions assessed by means of the particular assessment instrument, thus documenting student learning directly.
