

Criteria	Exceeds Expectations (3)	Meets Expectations (2)	Meets Expectations (1)	Does Not Meet Expectations (0)	Score
Aligns with strategic priorities related to student learning	Project activities and outcomes are explicitly aligned with strategic priorities and are likely to lead to transformative student learning beyond disciplinary boundaries.	Project activities and outcomes are explicitly aligned strategic priorities and are likely to lead to significant student learning.	Project activities and outcomes are explicitly aligned strategic priorities but potential for student learning is unclear.	Project activities and outcomes do not sufficiently align with strategic priorities.	
Brings a new niche that addresses an identified need in the Stetson learning community	Evidence presented convincingly demonstrates fellowship brings a new niche that supports a challenging and compelling need.	Evidence presented clearly supports a challenging and compelling need.	Evidence presented incompletely supports need.	Need is either not compelling OR evidence presented is insufficient.	
Demonstrates potential for broad impact	Proposal demonstrates strong potential for broad impact beyond the campus community and beyond the fellow's residency.	Proposal demonstrates potential for broad impact to campus community beyond the fellow's residency.	Proposal has potential for broad impact that is not well articulated.	Proposed activities unlikely to lead to broad impact.	
Professional development plan is appropriate and feasible	Professional development plan is sufficiently detailed and appropriately supports fellow's success at Stetson and advances their professional goals.	Professional development plan is somewhat detailed and appropriately supports fellow's success and advances their professional goals.	Professional development plan lacks detail but likely will support fellow's success at Stetson and likely advances their professional goals.	Professional development plan is insufficiently detailed to determine its impact.	
Assessment and sustainability plan demonstrate long-term viability of project	Proposal clearly describes how impact data will be obtained and used for continuous improvement as well as determine overall success of both project and scholar.	Proposal describes how impact data will be obtained and used to determine success of both project and scholar but doesn't clearly indicate how data will be used for continuous improvement.	Proposal generally address project evaluation but does not provide concrete examples indicating how impact data will be collected or used.	No plan for collecting impact data included.	
	Proposal articulates detailed plan that has strong likelihood of long-term sustainability for project or program beyond residency.	Proposal articulates detailed plan that has some likelihood of long-term sustainability for project or program beyond residency.	Proposal generally addresses sustainability but does not provide any concrete examples indicating how project or program will be sustained beyond residency.	No sustainability plan provided OR proposed activities are unlikely to sustain beyond residency.	
Budget is appropriate and aligned with project goals	—	Budget appropriately supports proposed activities and is linked to stated goals and objectives	—	No budget provided OR proposed budget does not conform to federal, state or institutional policies.
